

# Jackson Advantage<sup>®</sup> –rates

Variable annuities are long-term, tax-deferred investments designed for retirement, involve risks, and may lose value. Earnings are taxable as ordinary income when distributed. Individuals may be subject to a 10% additional tax for withdrawals before age 59½ unless an exception to the tax is met. Add-on benefits are available for an extra charge in addition to the ongoing fees and expenses of the variable annuity.

There is a variety of investment options available, see [jackson.com/performance](http://jackson.com/performance) for a full list of investment options. There also are fixed account options available. A fixed account can provide a guaranteed rate of return over a specified period. See the fixed account rates provided below.

<sup>1</sup> Interest rates are effective as of 01/02/2025 and are subject to change without notice. **Premium in the Fixed Account Options earns interest at a rate never less than the Fixed Account Minimum Interest Rate (FAMIR) (1% to 3% depending on the five-year Constant Maturity Treasury Rate).** The FAMIR may be redetermined once a year in January on the contract anniversary date. There may be periods when Jackson<sup>®</sup> restricts the amount of premium payments into, and the amount and frequency of transfers between, into, and from, any Fixed Account Option; to close any Fixed Account Option; and to require transfers from a Fixed Account Option. Withdrawals from the fixed accounts prior to the end of the guaranteed period may be subject to withdrawal charges and market value adjustments, which may reduce contract value. Market value adjustments do not apply to the 1-year Fixed Account Option. Fixed Account Options may not be available with the election of certain add-on benefits. Please see the prospectus for specific Fixed Account Options availability and limitations.
